Subject: Release for images for SETAC document
Attachments: Image 7-2 and Image 7-3 for release - MBeevers.docx

Mike,
Hello, I hope this note finds you well.

It has been a while, but Dave Fischer and I are trying to get the SETAC document to print. We have received and have nearly completed incorporating external comments on the document, and soon it will go back to SETAC and the publishers to being copy editing.

One of the things we need is to acquire releases for the images that will be printed in the book. We don't have too many, but there are two that are credited to you (I have attached a file with the two subject images for your reference). If you are ok with allowing SETAC to use these in the book, we will need you to send a note to this end. Below is text that should satisfy Wiley and SETAC for this purpose (you will need to specify how you want the credit to be titled ... for example Mace will specify that his photos are credited to "Mace Vaughan, *Xerces Society for Invertebrate Conservation*")

Please send this to: Larry, Jenn and Mimi, cc Dave and me

Thanks Mike, if you have any questions please don't hesitate to call me,
tm
